BCE BRITISH CHEMICAL ENGINEERING

INDEX TO VOLUME 13: JANUARY-DECEMBER 1968

PAGE REFERENCE*

January	pages	1 – 52
February	,,	53 – 100
March	,,	101 – 156
April	,,	157 – 212
May	,,	213 – 267
June	,,	268 – 321
July	,,	322 – 375
August	,,	376 – 428
September	,,	429 – 480
October	,,	481 – 532
November	,,	533 – 586
December	,,	587 – 638

*Page numbers shown in this index are those appearing within brackets in the journal.

MAIN ARTICLES

A

Absorption. See vapour-liquid contacting.
Adsorption. Developments in adsorption processes, by J. W. Carter. 72
Ammonia. Ammonia synthesis with overcritical ammonia heating, by W. Hennel. 182
High pressure ammonia recovery, by G. Guerreri. 606
Atomisation. A study of centrifugal atomisation and spray drying, by K. Masters and M. F. Mohtadi.
Part 2. 26
Part 3. 85

C

Centrifuges. Transient state theory of centrifuges, by C. R. Srimathi, B. Singh, and G. N. Bhat. 614
Chemical Reaction Engineering and Catalysis. Acetone oxidation, by D. A. Boiston. 23
An improved method for applying the fluid-particle concept to nonideal flow reactors, by T. E. Corrigan and E. L. Leggers. 36
High temperature flame reactors, by J. Schroeder and M. Seweryniak. 78
A study of rate data using transformations, by R. Mezaki and W. J. Hill. 116
Backmixing and chemical reaction in fluidised beds, by R. Latham, C. Hamilton, and O. E. Potter. 233
Frequency response for N stirred tanks with recycle, by T. E. Corrigan and R. Schaefer. 247
Preliminary evaluation of recycle processes, by C. J. Liddle. 284
Purification of unsaturates by chemical complexing, by K. R. Gray and P. Thurairajan. 295
Design of a cascade of semi-continuous reactors, by S. Z. Hussein and N. R. Kanath. 343
Fuel processing in fluidised beds, by K. McG. Bowling and P. L. Waters. 397
The effect of added magnesium on the activity of Raney nickel catalyst, by G. Narsimhan, P. H. Brahme, and D. Sengupta. 411
Application of chemical reaction kinetics in process scale-up, by T. E. Corrigan and M. J. Dean. 445
A thermally stable high pressure reactor for furfuryl alcohol production, by L. Hodossy. 449
Computers and Control. Computing for petrochemicals, by P. V. Youle. 68
Computation techniques in chemical engineering, by B. Hedström. 190
Process control in phosphoric acid manufacture by electrical conductivity, by S. E. Dahlgren. 301
A review of linear programming techniques, by J. R. Norman and R. C. Bowrey. 564
Liapunov methods in chemical engineering, by C. Storey. 574
The computer simulation of batch distillation processes, by M. R. Goldman and E. R. Robinson. 602
Cooling towers. Cross-flow cooling towers analysed, by S. Vouyoucalos. 360
The natural draught cooling tower, by L. A. Furzer. 459
Cryogenics. Natural gas liquefaction, by W. L. Nelson. 171
Predictions for the future of cryogenic applications, by R. W. Vance. 511

D

Data. Specific heat and thermal conductivity of organic liquids, by S. H. Ibrahim and A. V. Rao. 115
A study of rate data using transformations, by R. Mezaki and W. J. Hill. 116
Enthalpy-concentration data for acetonitrile-water and acetonitrile-ethanol, by C. C. Reddy. 515
Differential thermal analysis. The effect of particle size characteristics on the differential thermal analyses of powdered materials, by H. E. Rose and J. E. English. 405
Distillation. See vapour-liquid contacting.
Drying. A study of centrifugal atomisation and spray drying, by K. Masters and M. F. Mohtadi.
Part 2. 26
Part 3. 85

E

Evaporation. Entrainment removal from climbing film evaporators, by J. Hornby and R. F. Taylor. 119
Extraction. Advances in equipment for liquid-liquid extraction, by C. J. Mumford. 337
The mechanism of liquid coalescence, by A. H. Brown. 608

F

Filtration. Assessing the filtrability characteristics of industrial sludges using an expanded form of Carman equation, by M. D. Crook and W. D. Jones. 32
Fluidisation. Backmixing and chemical reaction in fluidised beds, by R. Latham, C. Hamilton, and O. E. Potter. 233
The pulse technique for investigating solids mixing in a fluidised bed, by H. Sandblom. 244
Stability of coupled fluidised beds, by R. J. A. Paul, T. T. Al-Naimi and D. K. Das Gupta. 250
Achieving high heat transfer rates in fluidised beds, by J. S. M. Botterill and M. K. D. Butt. 357
Progress in fluidisation, by J. S. M. Botterill. 391
Fuel processing in fluidised beds, by K. McG. Bowling and P. L. Waters. 397
Fluid Mechanics. Triangular plate vortex generators in flow measurement, by G. V. Evans. 133
Flow of fluids in pipes, by W. Hamilton and B. B. Macdonald 413
Foam separation. Studies on the foam separation process, by R. B. Grieves. 15

G

Grinding. The influence of pulp viscosity on fine-grinding in a ball mill, by B. Clarke and J. A. Kitchener. 347

H

Heat transfer. An electrical network method for combined free convective and radiative transfer from annular finned surfaces, by J. C. Dent. 28
Shell side pressure loss in baffled heat exchangers, by R. O. Parker and Y. I. Mok. 124
Scraped surface heat transfer with Knitmesh scrapers, by T. R. Bott and S. Azoory. 130
The development of flashing flow from existing nucleation sites, by D. C. Leslie. 174
Achieving high heat transfer rates in fluidised beds, by J. S. M. Botterill and M. H. D. Butt. 357
Heat transfer in mixers for non-Newtonian liquids, by P. S. Murti and K. Balakrishna Rao. 513
Laminar convection in uniformly heated vertical concentric annuli, by K. Sherwin. 569
A performance estimate of a granular solids heater, by S. R. Ramaswamy and E. R. Gerhard. 611

KEY TO REFERENCE LETTERS PRECEDING PAGE NUMBERS:

B = Book Reviews; C = Conferences and Meetings; F = Short Features; L = Letter; N = Nomogram; P = Progress in Chemical Engineering; PE = Plant Engineer's Notebook; PN = Process News.

M

Materials. The commonly used austenitic steels, by A. Briggs. 127
Materials handling. Vibratory conveyor and feeder systems, by W. L. Hickerson.
Part 1. 288
Part 2. 351
Mathematics. The application of queueing theory to batch manufacturing, by R. Goulcher. 135
Computation techniques chemical engineering, by B. Hedström. 190
The optimisation of a processing unit, by R. M. Wood. 228
A review of linear programming techniques, by J. R. Norman and R. C. Bowrey. 564
Liapunov methods in chemical engineering, by C. Storey.
Part 1. 574
Mathematics for engineers, a new approach, by M. Bruckheimer and R. C. Sterling. 616
Membranes. Developments in membrane processes, by J. W. Carter.
Part 1. 195
Part 2. 241
Mixing. Blending calculations for two product specifications, by J. R. Bourne. 305
Heat transfer in mixers for non-Newtonian liquids, by P. S. Murti and K. Balakrishna Rao. 513

P

Process evaluation and development. The optimisation of a processing unit, by R. M. Wood. 228
Preliminary evaluation of recycle processes, by C. J. Liddle. 284
Economic applications of air cooling to process industries, by R. T. Matthews. 497
Simulation of a synthetic rubber plant, by A. I. Johnson, M. Aizawa and W. F. Petryschuk. 504
Factors behind the nation's fuel and power policy, by J. S. M. Botterill. 556
Building petrochemical plants to schedule, by A. Briggs 561
Forecasting and development, by B. Locke. 623
Protein. Protein from petroleum hydrocarbons, by M. S. Iyengar and J. N. Baruh. 251
Pumps. The design, characteristics and uses of glandless metering pumps, by G. Vetter and O. Bohm. 452

V

Vapour-liquid contacting. Experimental determination of theoretical plates in a distillation column, by G. Guerreri. 21
Recovery of liquid substances from dilute solution, by G. Guerreri. 186
Curved operating lines for absorption of multicomponent systems, by H. A. Mostafa. 238
Calculation of number of trays allowing for backmixing and entrainment, by Z. Sterbacek. 291
Efficiency of turbogrid tray distillation columns, by P. Foldes and I. Evangelidi.
Part 1. 303
Part 2. 463
Non-adiabatic binary distillation calculations, by C. Hanson. 404
Free and captured entrainment and plate spacing in a perforated tray column, by R. J. Calcaterra, C. W. Nicholls, and J. H. Weber. 466
A method of prediction and correlation of pressure drop per theoretical plate in packed distillation columns, by K. E. Porter and N. Ashton. 550
The computer simulation of batch distillation processes, by M. R. Goldman and E. R. Robinson. 602
Polygonal helicoids as a packing, by E. Rotstein, E. A. Brignole, and E. S. Perey. 619

EQUIPMENT NEWS

A

Actuators. Linear actuator. E. 2
New range of pneumatic actuators. E. 103
Twin power pneumatic actuator. E. 378
Adhesives. Special adhesive. E. 2

B

Boilers. Continuous removal of liquor from boilers and evaporators. E. 55
Giant boiler drum has 1,440 steel tube stubs. E. 268
Bonding. Bonding dissimilar metals. E. 158
Burners. Efficient burner for waste oil containing water. E. 101
High performance burner for near and sub-stoichiometric operation. E. 214

C

Calculation aids. Viscosity-temperature chart aids calculations. E. 215
Electronic calculator for engineers. E. 432
Centrifuges. Glandless airtight centrifuge. E. 56
Automatic recycling centrifuge. E. 158
Clarifiers. High capacity clarifier. E. 213
Classifiers. Fluidised bed classifier. E. 53
Pneumatic pinched sluice. E. 157
Coatings. Spraying of epoxy resins. E. 55
Protective coatings – service and equipment. E. 483
Plastic lining of awkward components by vacuum. E. 533
Surface coating resins. E. 591
Compressors and fans (see also **Pumps**). Fume handling fans. E. 158
Reciprocating compressor has moments and forces fully balanced. E. 429
Computers. Low price computer controls multiplant complex. E. 533
Powerful linear programming package. E. 587
Controllers (see also **Instruments**)
Low cost temperature controllers. E. 3
Measurement of liquid-liquid interface. E. 4
Solid state controller. E. 54
Proportional liquid level controllers. E. 56
Solid state level controllers. E. 103
Liquid level safety switch. E. 103
Temperature-pressure regulators. E. 104
Miniature controls stations simplify operator's task. E. 324
Danish Government plant is fluidic controlled. E. 432
Remote control of storage and mixing plant. E. 432
Conveyors (see also **Materials handling**)
Pneumatic conveyor system. E. 53
Novel conveyor idler. E. 157
Vibratory tubular conveyors/feeders. E. 270
Conveyor based filter replaces pan type. E. 322
Enclosed tubular conveyor. E. 431
Vibratory tray conveyor. E. 484
Cooling towers. Cooling towers have water-driven fan. E. 325
New design cooling tower has coloured GRP panels. E. 484
Cryogenics. Cryogenic equipment. E. 4
Cryogenic transfer lines. E. 160
Modular vaporiser for cryogenic fluids. E. 378
Helium liquefiers with piston expanders. E. 430

Crystallisers. Evaporator - crystalliser plant. E. 379

D

Distillation and Absorption.
Bubble cap grid trays. E. 322
A bladed valve tray. E. 323
Costs cut for large columns. E. 379
Distillation packing with low hydraulic resistance. E. 482
Driers. An unconventional fluid bed drier. E. 101
Industrial drying cabinet. E. 322
Physical adsorption drier. E. 323
Continuous band drier. E. 483
Universal drying unit development. E. 484
A new tubular freeze drier. E. 535
Continuous vacuum drier. E. 587

E

Electrolysis. Fluidised bed electrode for electrochemical cells. E. 159
Evaporators. Falling film evaporator. E. 2
Continuous removal of liquor from boilers and evaporators. E. 55
Residence time control for thin film evaporators. E. 102
Evaporator-crystalliser plant. E. 379
Evaporation technique overcomes problems in enzyme concentration. E. 485
Extractors. Multistage liquid-liquid extractor. E. 4
A.R.D. extractor. E. 587

F

Fabrication. Heavy fabrication. E. 215
Lead prefabrication feeds precipitator construction. E. 268
Portable pipefacing machine. E. 325
Wear and corrosion resistance from new welding alloy. E. 433
New pressure vessel welding process. E. 482
Multipurpose welding equipment. E. 588
Filters. Continuous GVP filter. E. 1
Dust collection. E. 102
Foam dust separators. E. 103
Submersible pumps and filters. E. 159
Conveyor based filter replaces pan type. E. 322
Gas filters with quick release closure. E. 324
Polishing filter has other uses. E. 326
Packaged electrical precipitator. E. 326
Rotary filter. E. 377
New automatic basket filter system uses high flow fluidic switching. E. 429
Compact high capacity dust filter. E. 481
Self contained dust extraction unit in GRP. E. 483
Rotary high capacity filter. E. 535
Mist eliminator for extract systems. E. 569
Finance. Private backing for technical innovations. E. 377
Flotation. Large flotation machine offers many advantages. E. 379

G

Granulation. Submerged granulator. E. 102
Peg type granulator for damp plastic materials. E. 589
Grinding. Rubber lined grinding mill. E. 55
Aid to peak efficiency in grinding. E. 431

H

Heat transfer. Heat transfer plant. E. 4
Heavy duty heat exchangers. E. 54
Novel heat exchanger design. E. 101
Dimpled thermal jackets. E. 213
New thermal strip jacketing. E. 269
Modular vaporiser for cryogenic fluids. E. 378
Standardised range of air coolers. E. 431
Kettles that heat and cool resins. E. 433
Unidirectional heat exchanger. E. 481
Do it yourself heat exchanger system. E. 536
Plate-type exchanger for corrosive liquids. E. 588
Cooling hard-type resins. E. 588
Packed shell and tube exchanger. E. 590

I

Inert gas. Inert gas generator. E. 157
Instruments. Digital voltmeters. E. 1
Statistical analysis. E. 3
Stainless steel flow indicators. E. 53
Tantalum electroclad thermowells. E. 54
Opacity recorder. E. 55
Integrator prices pegged. E. 55
Small gas leak detector. E. 55
Low pressure switch. E. 103
Modular temperature monitor. E. 103
Sight pressure indicator. E. 160
Monitoring liquid density. E. 326
Self-actuated gas flow computer. E. 378
A manometer for flow measurement. E. 378
Porthole level gauge makes use of self cleaning principle. E. 430
New liquid level switch. E. 533
True mass flowmeter. E. 588
Pendulum switch indicates overloading or abnormal flow. E. 589

L

Lagging. Adhesive lagging cloth. E. 158

M

Material. Bright annealed stainless. E. 157
Asbestos reinforced laminates. E. 214
Plasticised steel. E. 269
Steels from stock. E. 322
Stainless steel developed for hot chloride environments. E. 323
High temperature silicone rubber. E. 326
Expanded steel stocks are computer controlled. E. 379
New stainless steel used in nitric acid tower. E. 534
Materials handling. Dustless weighing and bagging. E. 53
Feeder for pneumatic conveying. E. 324
High performance rotary air-lock. E. 377
Continuous feeding of solids. E. 380
Collapsible fluid containers are pelleted for storage and transportation. E. 431
Storage and mechanical handling in chemical plants. E. 432
Trough for hot sulphuric acid. E. 484
Intermediate bulk containers. E. 533
Fast draining of semi-solids. E. 534
Versatile pneumatic conveying system. E. 534
Pneumatic conveyor system. E. 587
Auto dispenser. E. 591
Milling. Crossflow classifying mill. E. 102
Mixing. Variable venturi mixing unit for LP gas plant. E. 268
New use for turbo blenders. E. 269
Controlled liquid-solid mixing. E. 270
Intensive mixing. E. 325
Packaged mixing plants. E. 483
Turbulent high speed mixer has low power consumption. E. 535
Top entry mixers. E. 587
Continuous powder blender. E. 589
Packaged mixer-settler units. E. 589
Variable speed disperser. E. 590
In line mixer. E. 591

P

Pipes. Trenchless pipe laying. E. 2
Large diameter pipes. E. 102
Cryogenic transfer lines. E. 160
PTFE fittings. E. 323
Pipeline joint repair kit. E. 379
New nylon lined hose. E. 430
Pumps. Smaller controlled volume diaphragm pump. E. 3
Long service glandless pump. E. 3
Gear pumps for abrasive-corrosive duties. E. 54
Submersible pumps and filters. E. 159
Self priming plastic pump. E. 213
Magnetic coupling pump for corrosive liquids. E. 429
Helium liquefiers with piston expanders. E. 430
Pump for corrosive liquids. E. 432
Pump offers infinitely variable flow. E. 482
In line process pumps. E. 590
Planetary piston vacuum pump. E. 590
New chemical processing pumps. E. 590

S

Sampling. Pressure equalised sampling system. E. 2
Scrubbers. Wet scrubber with multiple action. E. 53
Absorption scrubber for desulphurising flue gases. E. 484
Separators. New separator for liquids and/or solids. E. 482
New separator pelletises soot particles in wash water from oil gasification. E. 588
Services. Industrial engineering service. E. 590

T

Temperature measurement.
Temperature measurement in silos. E. 326
Trays (see also **Distillation**)
A new valve tray. E. 214
Inclined grid tray. E. 432

V

Valves. Diaphragm control valve. E. 1
Firesafe ball plug valve. E. 104
Diaphragm valves. E. 104
Liquid transfer. E. 158
New plastic ball valves. E. 214
Reinforced plastics butterfly valve. E. 215
New control valve can lower overall plant costs. E. 268
Solenoid shut off valve. E. 325
Packless valve. E. 377
Cheaper ball valves for natural gas. E. 380
U.K. valve manufacturer goes DIN E. 484
New seats raise ball valve limits. E. 535
Vessels. Jacketed processing vessels. E. 159

W

Water treatment. Water treatment plant. E. 1

PROCESS NEWS

A

Acetonitrile. Acetonitrile – extractive distillation solvent for C4. PN. 61
Adiponitrile. Commercial electrolytic production of adiponitrile. PN. 383
Alcohol. Low temperature process for oxo alcohol synthesis. PN. 489
Ammonia. Ammonia synthesis. PN. 163
Ammonium Phosphate. Ammonium phosphate crystals from a fluidised bed. PN. 164
Ammonium Sulphate. Dehydration of ammonium sulphate solutions in a fluidised bed drier. PN. 219
Aromatics. High pressure catalytic liquid phase reduction of aromatic nitrocompounds. PN. 489

B

Benzene. Benzene process from Japan. PN. 274
Black Liquor. Oxidation of weak black liquor. PN. 9
Weak black liquor oxidation system. PN. 438

C

Caprolactan. Caprolactan by photonitrosation of cyclohexane – Toray Process. PN. 219

Casting. Reclamation of porous components. PN. 60
Cement. Sulphuric acid-cement process. PN. 219
Chlorine. Electrochemical manufacture of chlorine and soda. PN. 595
Coal. Fluid bed coal gasification. PN. 107
Direct hydrogenation of coal. PN. 107
Concrete. Foam concrete from chemical industry wastes. PN. 9
Cyclohexane. Caprolactan by photonitrosation of cyclohexane – Toray Process. PN. 219
Cyclohexanone. Hydrogenation of phenol to cyclohexanone. PN. 59
Cycloparaffins. Lower fatty acids from cycloparaffins. PN. 59

D

Desalination. Nuclear desalination. PN. 273
Conjunctive use of desalination. PN. 540
Design. New world-wide process design facility. PN. 8
Desulphurisation. Desulphurisation process gains Queen's award for technological innovation. PN. 539
Detergent. Detergent plant. PN. 384
Dewaxing. Dewaxing petroleum concentrates with aluminium stearate. PN. 540
D.D.T. Replacement for D.D.T. PN. 438
Distillation. Continuous flow in line fractionation and exchange of volatile solvents. PN. 7

E

Effluents. Potable water from sewage works effluent. PN. 218
Total effluent disposal plant. PN. 438
Waste water treatment. PN. 590
Pollutionless refuse incineration. PN. 594
Epoxides. Direct oxidation of olefins to epoxides. PN. 488
Ethylene. Increased ethylene yield via propylene disproportionation. PN. 60
Ethylene Oxide. Ethylene oxide. PN. 107

F

Fatty Acids. Lower fatty acids from cycloparaffins. PN. 59
Fertilisers. Cheaper nitrophos fertilisers. PN. 59
Totally soluble NP/NK fertilisers – nitric acid process. PN. 436
Fluor. Fluor listed on European market. PN. 384
Formaldehyde. Deacidification of formaldehyde. PN. 273
Fuel Gas. Conversion of plastics wastes to fuel gas. PN. 163

H

Heat Transfer. Direct contact heat exchange. PN. 108
Hydrocarbons. Recovery of hydrocarbon chlorides. PN. 273
Cryogenic hydrocarbon recovery. PN. 594
Hydrocracking. Hydrocracking of heavy oils. PN. 218
Hydrofluoric Acid. Production of 80% hydrofluoric acid. PN. 596
Hydrogen. High purity hydrogen. PN. 59
Compact electrolytic hydrogen plant. PN. 488
Hydrogenation. Direct hydrogenation of coal. PN. 107
Hydrogenation of coal and tar to liquids. PN. 108

L

Laboratory. New research laboratory at Kirkby. PN. 274
Lyes. Purification of lyes in electrolytic manufacture of sodium chlorate. PN. 436

M

Molybdenite. Recovery of sulphur from molybdenite. PN. 596

N

Nitric acid. Reducing nitric acid plant air pollution. PN. 61
Totally soluble NP/NK fertilisers – nitric acid process. PN. 436
Nitrogen. World nitrogen production 1968–1970. PN. 164

Oil. In situ production of oil from shale using nuclear explosives. PN. 539
Olefins. Direct oxidation of olefins to epoxides. PN. 488

P

Phenol. Hydrogenation of phenol to cyclohexanone. PN. 59
Phenylphenol. Synthetic p-phenylphenol. PN. 438

R

Refining. Specialised refining. PN. 384
New refinery for S.A. PN. 595
Resins. Polyester resins. PN. 108
Prilling viscous resins. PN. 163
Rubber. Utilisation of waste rubber tyres. PN. 384
U.K. rubber black plant employs new process. PN. 595
New synthetic rubber ideal for giant tyres. PN. 595

S

Soda. Electrochemical manufacture of chlorine and soda. PN. 595
Sodium Chlorate. Purification of lyes in electrolytic manufacture of sodium chlorate. PN. 436
Sodium Hydroxide. Improvements in caustic soda manufacture. PN. 595
Sodium Monoxide. Sodium monoxide for drying organic solvents. PN. 273
Steam. Steam re-aeration using tonnage oxygen. PN. 8
Steel. Bright annealing of stainless steel. PN. 7
Sulphur. Recovery of sulphur from flue gases. PN. 330
Recovery of sulphur from molybdenite. PN. 596
Sulphur dioxide. Sulphur dioxide removal from flue gases. PN. 108
Sulphuric acid. Sulphuric acid-cement process. PN. 219

T

Titanium. Open shop titanium production. PN. 329

U

Uranium. Uranium separation. PN. 273
Uranium from sea water. PN. 436

W

Water softening. Sea water softening by lime magnesium carbonate. PN. 60
